

Programming Language Design  
10.7, 10.8

**7.**

The only items that need to be added are the V functions over statements and expressions as provided on p. 149. Within the V check on a function, it will check  $V(f.body, tm)$ , which would go to the rule on p. 148, which checks a Block of statements.

**8.**

Similar to number 7, we simply need to link the call of M to  $f.body$  to the M function provided in ch. 8 over a Block.
